About Us

At Naviafri Telematics, we are pioneers in shaping the future of connected mobility solutions. Founded on a vision of enhancing safety, efficiency, and sustainability in transportation, we harness cutting-edge technology to revolutionize the way vehicles communicate, navigate, and operate on roads worldwide.

Our Mission

Our mission is to empower businesses and individuals with innovative telematics solutions that optimize fleet management, improve driver safety, and streamline operations. Through our relentless pursuit of excellence, we aim to drive positive change in the automotive industry, making transportation smarter, safer, and more sustainable..

Our Expertise

With years of expertise in telematics, IoT, and data analytics, our team of passionate professionals is dedicated to delivering tailored solutions that meet the unique needs of our clients. From fleet tracking and route optimization to driver behavior analysis and dashboarded cameras, we leverage the latest advancements in technology to provide actionable insights that drive business growth and efficiency.

Our Values

Our Values

At NaviAfri Telematics, we are guided by a set of core values that define who we are and how we operate

Innovation: We continuously push the boundaries of what's possible, exploring new technologies and ideas to stay ahead of the curve.

Integrity: We conduct our business with honesty, transparency, and a commitment to ethical practices.

Collaboration: We believe in the power of collaboration, working closely with our clients and partners to achieve mutual success.

Excellence: We strive for excellence in everything we do, setting high standards and delivering results that exceed expectations.

Sustainability: We are committed to creating sustainable solutions that minimize environmental impact and contribute to a greener future.

Company History

Naviafri Telematics, Operating as Frotcom Intelligent Fleet, made its entry into the Zambian market in 2019, bringing with it a rich legacy of over 25 years in the telematics industry. Established in Ndola, Zambia, our journey began with a steadfast commitment to providing advanced solutions for fleet management and vehicle tracking.

Our Evolution

Since our inception, we have evolved into Naviafri Telematics, aligning our brand with our vision for the future of connected mobility. While our name may have changed, our dedication to excellence and innovation remains unwavering. Today, we proudly serve not only Ndola but also have expanded our footprint across Southern and East Africa, establishing branches in key locations to better serve our growing clientele.

FILLING STATION MANAGEMET

Our smart station solution connects geographic dispersed chains of fuel stations. Providing realtime insights of each fuel station.

GPS Tracking & Filling station Management

Naviafri Telematics offers a comprehensive suite of solutions designed to address the diverse needs of businesses and individuals in the transportation industry, including:

FLEET MANAGEMENT

Fleet Management: Gain real-time visibility into your fleet operations, optimize routes, monitor driver behavior, and improve fuel efficiency.

Driver Safety Identify risky driving behavior, provide actionable feedback to drivers, and reduce the risk of accidents on the road.

Driver License Expiry Alerts Our advanced telematics system tracks the expiration dates of driver licenses, providing timely reminders to ensure that your drivers maintain valid licenses at all times.

Asset Tracking: Track the location and status of valuable assets, equipment, and cargo to improve security and streamline logistics.

Insurance Renewal Notifications: Keeping track of insurance renewal dates can be challenging, but with Naviafri Telematics, it's effortless. Our system monitors insurance expiration dates and sends proactive notifications, allowing you to renew policies promptly and maintain continuous coverage for your vehicles.

Road Tax Renewal Reminders: Road tax compliance is essential for legal operation on the roads. Naviafri Telematics simplifies the process by sending timely reminders for road tax renewal, helping you avoid penalties and disruptions to your operations.

- Know Fuel Level of your vehicles
- Receive Filling and draining alerts
- Cut off the Engine remotely
- Reports
- Driver behavior Analysis
- Real Time tracking
- Local and Cross border

Naviafri Telematics leverages advanced artificial intelligence (AI) capabilities to enhance safety on the roads and improve overall fleet management. Our AI functions include:

Smoking and Driving Alerts: Our AI-powered system detects instances of smoking while driving, alerting fleet managers in real-time. This proactive approach helps mitigate the risks associated with distracted driving and reduces the likelihood of accidents caused by smoking-related distractions.

Using Mobile Phone Alerts: Naviafri Telematics utilizes AI algorithms to identify when drivers are using their mobile phones while behind the wheel. Instant alerts are sent to fleet managers, enabling them to take immediate action to address the behavior and reinforce safe driving practices.

Fatigue Detection: Through AI-based analysis of driver behavior and biometric data, our system can detect signs of driver fatigue. By monitoring factors such as steering patterns, eye movements, and vehicle dynamics, Naviafri Telematics provides early warnings of potential fatigue-related risks, allowing for timely intervention to prevent accidents.

Distraction Detection: Our AI algorithms analyze various sources of distraction within the vehicle, including eating, drinking, adjusting controls, and interacting with passengers. By identifying and categorizing distraction events in real-time, Naviafri Telematics helps fleet managers understand the factors contributing to driver distraction and implement targeted interventions to promote safer driving habits.

By harnessing the power of AI, Naviafri Telematics enables proactive safety measures that mitigate risks, protect drivers, and safeguard assets. Contact us today to learn more about how our AI functions can enhance safety and efficiency in your fleet operations.

FILLING STATION MANAGEMENT

FMS (Forecourt Management System): Our FMS module provides end-to-end management of forecourt operations, including fuel dispensing, payment processing, inventory management, and customer engagement. With real-time monitoring and analytics, FMS optimizes fuel station performance, minimizes downtime, and improves customer satisfaction.

ATG System (Automatic Tank Gauging): Naviafri Telematics integrates ATG technology to automate the monitoring and management of fuel storage tanks. Our ATG system accurately measures fuel levels, detects leaks, and ensures compliance with regulatory standards. By providing instant alerts and predictive maintenance insights, ATG enhances operational efficiency and prevents costly disruptions.

Automated Inventory Control: Our Filling Station Management solution features automated inventory control capabilities, enabling real-time tracking of fuel stock levels, replenishment scheduling, and automatic reorder alerts. By optimizing inventory management, we help fuel stations minimize stockouts, reduce excess inventory, and maximize profitability.

Transaction Monitoring and Security: Naviafri Telematics ensures secure and transparent transaction monitoring at every stage of the fueling process. Our system records and tracks fuel sales, payments, and dispenser activity, providing detailed transaction reports and audit trails for accountability and compliance purposes.

Customer Relationship Management (CRM): With our integrated CRM functionality, fuel stations can personalize customer interactions, manage loyalty programs, and analyze purchasing patterns to drive customer engagement and retention. By leveraging customer data and insights, our CRM module helps fuel stations enhance customer satisfaction and loyalty.

Remote Management and Analytics: Naviafri Telematics enables remote management and analytics capabilities, allowing fuel station operators to monitor performance metrics, analyze trends, and make data-driven decisions from anywhere, at any time. Our intuitive dashboard provides actionable insights for optimizing operations, improving profitability, and staying ahead of market dynamics.

Naviafri Telematics empowers filling stations with advanced technologies and intelligent solutions to transform their operations, drive growth, and deliver exceptional customer experiences. Contact us today to learn more about our Filling Station Management system and how we can support your business goals.

COLD CHAIN BUSINESS

Wireless Temperature Monitoring System:

Sensors: Small, wireless temperature sensors are installed in refrigerated trucks and containers. These sensors accurately measure temperature levels and transmit data wirelessly.

Real-time Monitoring: Temperature data is sent to a cloud-based platform or a central monitoring station, where it can be accessed remotely through desktop or mobile apps.

Alerts and Notifications: Set temperature ranges and receive alerts when thresholds are exceeded, ensuring prompt action to prevent temperature excursions.

Data Analytics: Historical data and analytics provide insights into temperature trends, helping optimize transportation conditions and identify potential issues.

Compliance: Generate reports and records to demonstrate compliance with regulatory requirements, such as FDA and GDP guidelines.

Benefits:

Improved Food Safety: Ensure perishable goods remain within safe temperature ranges, reducing the risk of spoilage and contamination.

Reduced Costs: Minimize waste, lower insurance costs, and optimize transportation conditions to reduce energy consumption.

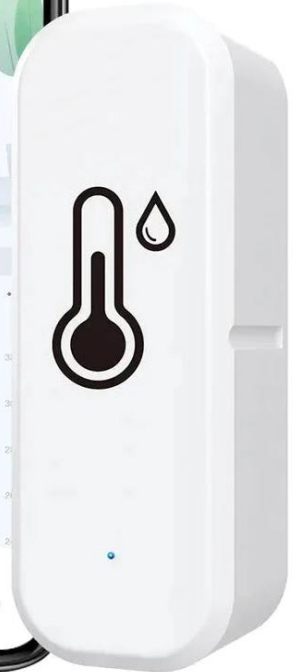

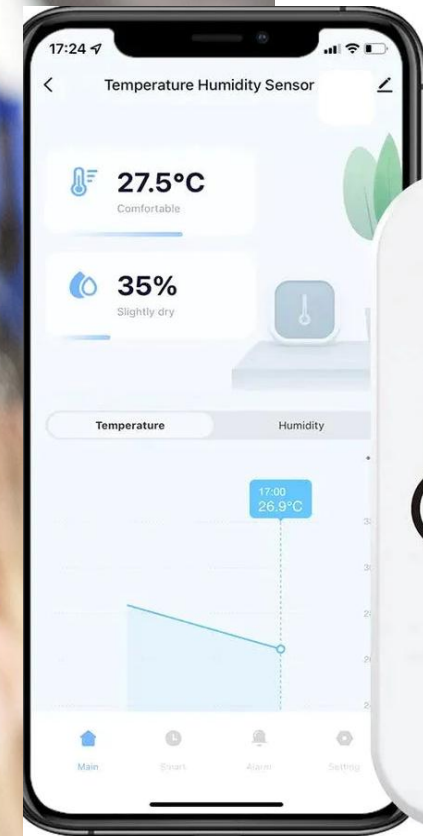

Enhanced Compliance: Simplify regulatory compliance, reduce audit risks, and demonstrate a proactive approach to temperature control.

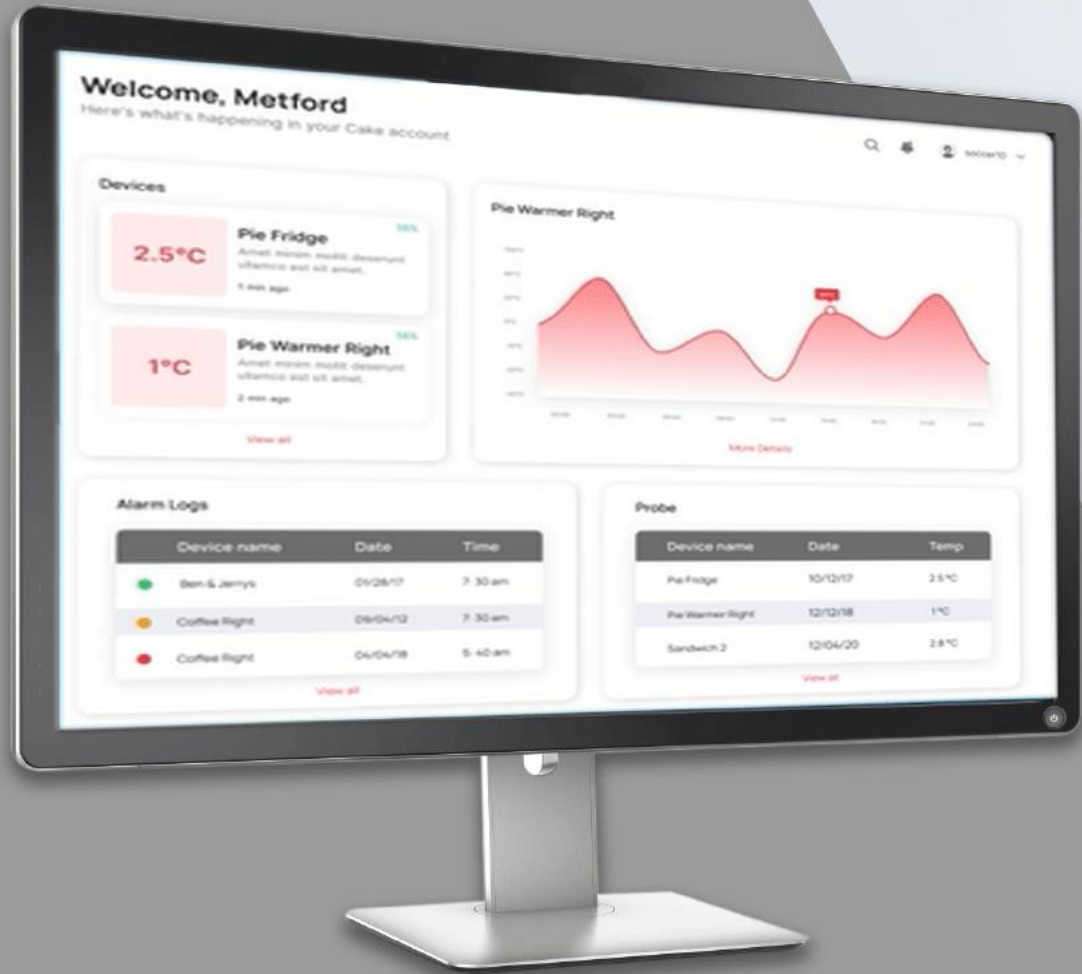

Increased Efficiency: Optimize routes, reduce transit times, and improve supply chain management with real-time temperature monitoring.

By offering wireless temperature monitoring for refrigerated trucks and containers, Naviafri Telematics can help companies in the cold chain industry ensure the integrity and quality of their perishable goods, while also improving operational efficiency and reducing costs

8 Benefits of a **Wireless** **Temperature** Monitoring System

Food Safety: Ensure perishable goods remain within safe temperature ranges, reducing the risk of spoilage and contamination.

Reduced Spoilage: Minimize waste and losses due to temperature excursions, saving you money and reducing environmental impact.

Compliance: Easily demonstrate regulatory compliance with temperature records, reducing audit risks and fines.

Improved Quality: Monitor temperature to ensure goods arrive in optimal condition, maintaining quality and customer satisfaction.

Reduced Claims: Decrease the likelihood of insurance claims due to temperature-related damage or spoilage.

Optimized Routes: Use temperature data to optimize routes and reduce transit times, lowering fuel costs and emissions.

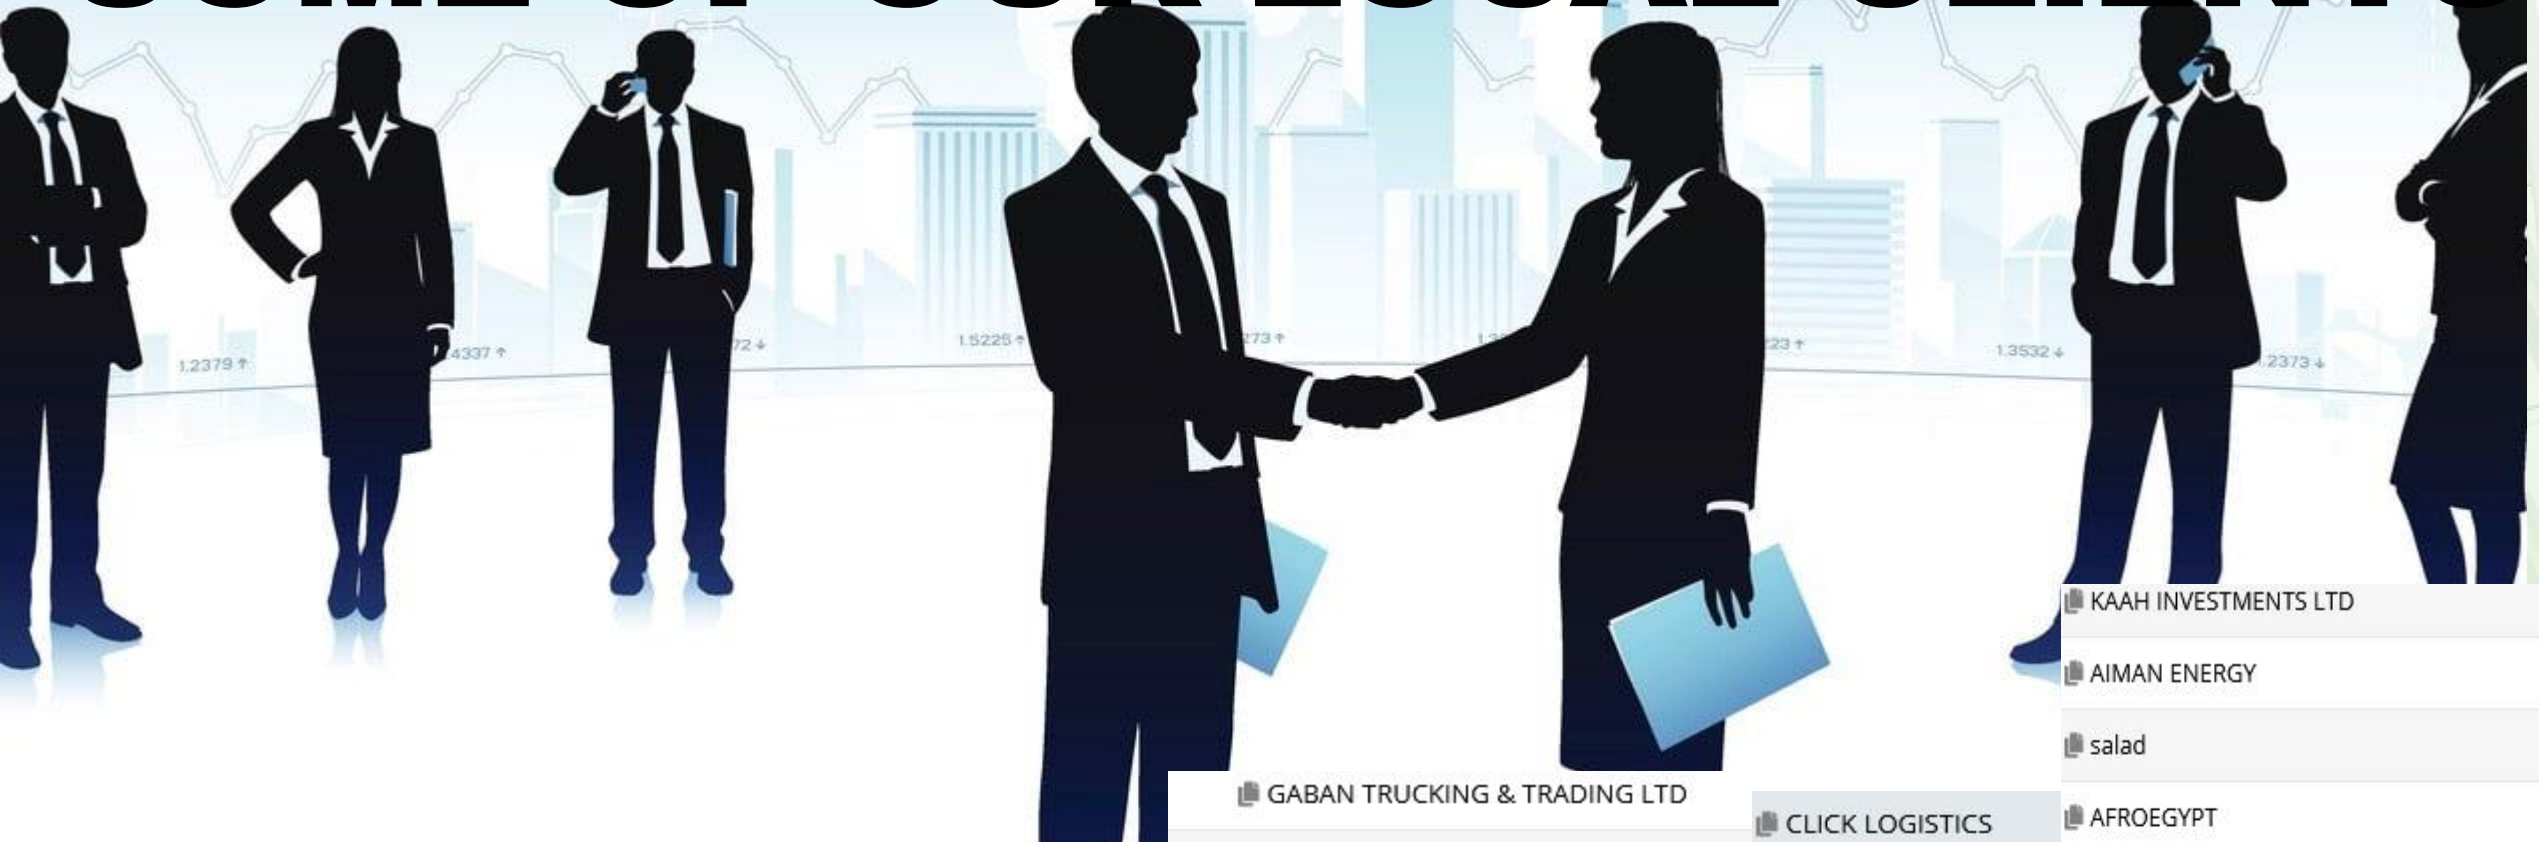

Proactive Maintenance: Identify potential equipment failures or issues before they occur, reducing downtime and repair costs.

Increased Customer Trust: Demonstrate a commitment to quality and food safety, enhancing your reputation and customer trust.

By monitoring temperature in refrigerated trucks, you can ensure the integrity and quality of perishable goods, reduce costs, and improve operational efficiency.

Our COVERAGE

Naviafri Telematics stands as the unrivaled leader in network coverage, boasting the most extensive and robust infrastructure across Southern and East Africa. With our strategically positioned branches and partnerships, we offer unparalleled coverage that spans remote regions, urban centers, and everything in between.

Our commitment to expanding our network ensures that our clients benefit from reliable connectivity and support wherever their operations take them. Choose Naviafri Telematics for unparalleled network coverage and unlock the full potential of your fleet management and telematics solutions.

Our customers

"Outstanding Service and Support"

Naviafri Telematics truly sets the standard when it comes to customer service. From the moment we partnered with them, their team has been incredibly responsive and attentive to our needs. Whenever we've encountered an issue or had a question, they've been quick to provide solutions and support. Their dedication to customer satisfaction is commendable, and we're proud to be working with such a reliable and professional partner.

ZAMBEEF

"Transformed Our Fleet Operations"

Since implementing Naviafri Telematics' solutions, we've experienced a significant transformation in our fleet management processes. Their innovative technology has enabled us to optimize routes, improve fuel efficiency, and enhance driver safety. The insights provided by their platform have been invaluable in making informed decisions and driving operational excellence. Naviafri Telematics has truly revolutionized the way we manage our fleet, and we couldn't be happier with the results.

ACCESS LOGISTIC

Seamless Integration and User-Friendly Interface"

We were impressed by how seamlessly Naviafri Telematics' solutions integrated with our existing systems. The implementation process was smooth, and their team provided excellent support every step of the way. The user interface of their platform is intuitive and user-friendly, making it easy for our team to navigate and leverage its full capabilities. With Naviafri Telematics, managing our fleet has never been more efficient or straightforward.

PROPOSAL

Executive Summary:

Our company, offers comprehensive Fleet Management Services designed to optimize your fleet's efficiency, reduce costs, and enhance overall performance. Our expertise and cutting-edge technology will help you streamline operations, improve driver safety, and increase customer satisfaction.

Introduction:

Fleet management is a critical component of any organization that relies on vehicles to operate. Effective fleet management can significantly impact your bottom line, customer satisfaction, and brand reputation. Our fleet management services are tailored to meet the unique needs of your business, ensuring maximum returns on investment.

Services

- Vehicle Tracking and Telematics
- Fleet Maintenance
- Fuel Management and Optimization
- Driver Management and Training
- Vehicle Inspections and Compliance
- Fleet Analytics and Reporting
- Temperature Sensors
- Real Time GPS tracking
- Geo zones
- Remote immobilizer (Cut off Engine via App)
- Route Planning
- Compliance reminders
- Road Tax, Insurance, Fitness
- Service reminders

- Driver behavior Analysis
- AI DASH CAMERA
- Alerts When
- Driver is smoking
- using a phone
- Not wearing seatbelt
- Drinking
- Fatigue
- Distracted

Benefits:

- Reduced Fuel Consumption and Costs
- Extended Vehicle Lifespan
- Improved Driver Safety and Behavior
- Enhanced Customer Satisfaction
- Increased Efficiency and Productivity
- Data-Driven Decision Making

Implementation:

- Initial Consultation and Needs Assessment
- Customized Solution Development
- System Installation and Training
- Ongoing Support and Maintenance

Pricing:

- Competitive pricing models tailored to your fleet size and needs
- Flexible payment structures to suit your budget
